

D-Band High Gain Lens Horn Antenna 110 to 170 GHz, WR06, 40 dBi Gain

DESCRIPTION

Anteral's High Gain Lens Horn Antennas are composed by a rectangular waveguide feeder with high quality standard flange that illuminates a **plano-convex** Teflon (PTFE) lens in order to apply phase correction and achieve superior performance with minimum size. The lenses are designed with optimized hyperbolic profile to reduce the aberration to the minimum. The whole system is encapsulated inside an aluminum cylinder that gives high robustness and it counts with a flat side to be the antenna able to stand in a flat surface.

The LHA-HG-WR06 model operates at the D-band between 110 and 170 GHz with 40 dBi nominal mid-band gain and a typical VSWR of 1.5.

APPLICATIONS

High Gain Lens Horn Antennas are especially useful when high gain is required with the minimum size. Therefore, these antennas are widely used in radar applications, communication and meteorological systems among others.

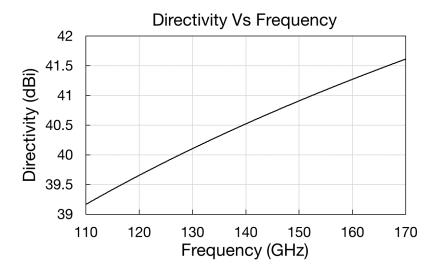

Anteral also offers their Lens Horn Antennas that exhibit also high gain (>30 dBi) with minimum size at frequencies from 8 to 170 GHz.

ELECTRICAL SPECIFICATIONS

| Parameter | Typical value |
|-------------------------|---------------|
| Frequency | 110 - 170 GHz |
| Directivity | 40 dBi |
| 3 dB Beamwidth, E-plane | 1.6 deg |
| 3 dB Beamwidth, H-plane | 1.6 deg |
| Sidelobe, E-plane | -29 dB |
| Sidelobe, H-plane | -35 dB |
| S11 | -14 dB |

LHA-HG-WR06

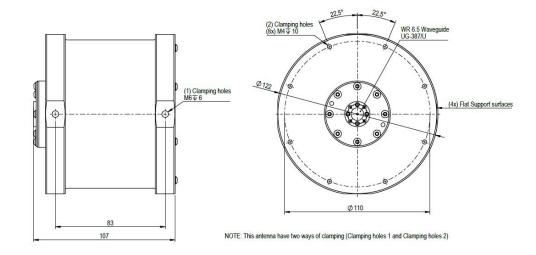

MECHANICAL SPECIFICATIONS

| Parameter | Description |
|----------------|-------------------------------|
| Antenna Port | WR-6.5 (1.651 mm x 0.8255 mm) |
| Flange | UG-387/U |
| Total length | 107 mm |
| Total diameter | 122 mm |
| Total weight | 940 g |
| Horn Material | Aluminum |
| External Color | Ruby Red |

LHA-HG-WR06

MECHANICAL OUTLINE

Additional notes

Directivity and radiation pattern data are simulated. Actual values have been checked experimentally but they could vary slightly. The return loss performance of all items is checked before delivery.
